

Appl. No. 10/708,333  
Amdr. dated April 3, 2006  
Reply to Office action of March 6, 2006

**REMARKS/ARGUMENTS**

**1. Election/Restrictions:**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

5       **Group I:** Claims 1-9, drawn to a heating device, classified in class 219, subclass 538.

**Group II:** Claims 10-15, drawn to method for fabricating a microstructure, classified in class 216, and subclass 52.

10       The inventions are distinct, each from the other because of the following reasons:

          Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of following can be  
15       shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP §806.05 (h). In the instant case, the product as claimed can be used in a materially different process of using that product such as forming a pattern  
20       using a single stamper instead of two stampers as recited in claim 10.

          Because these inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classification and recognized divergent subject matter, and the search  
25       required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
